

Bridge to Home

Home Loans Tailored to Your Unique Needs

Home ownership is one of life's greatest accomplishments. We believe that everyone should have an opportunity to own their own home or be able to refinance their existing homes. Our Bridge to Home Loan program is designed for applicants who do not fit into the "standard boxes" of many other lenders who use a "one size fits all" solution. It is the perfect fit for:

- Self-Employed Persons
- Independent Contractors
- Small Business Owners
- Individuals with Irregular Income
- Immigrants / Foreign Nationals
- Corporations, Trusts or LLCs
- Persons with Past Credit Issues

Disclaimer

All rates, fees, products and program guideline are subject to change or discontinuance without prior notice. Other limitations and restriction may apply. All loans subject to East West Bank's application, underwriting, appraisal and credit approval. Program available in select counties of California, Georgia, Massachusetts, Nevada, New York, Texas and Washington. Cash-out refinancing is not available in the state of Texas.

East West Bank offers mortgages on properties in select areas within the United States. The mortgage loan documents and transaction will be conducted in English. If you do not read or speak fluent English, you will need to retain a reliable translator. The Bank is not responsible for, and you will not rely on, translation by the Bank. All transactions will be conducted in the U.S.; an attorney-in-fact can sign loan closing documents if appointed by a legally acceptable Power of Attorney. A valid government-issued ID card is required for all applicants for identity verification purposes.

Glossary

Debt-to-Income Ratio (DTI Ratio)

DTI ratio is calculated by project monthly debt payment divided by the monthly gross income.

For example: Assume the monthly mortgage payment is \$3,600. The monthly auto loan payment is \$900. The monthly student loan payment is \$500. The monthly credit card payment is \$500. The monthly gross income is \$10,000. The DTI Ratio is 55% (Total monthly debt payment of \$5,500 divided by \$10,000. Total monthly debt payment of \$5,500 is the sum of monthly mortgage payment, monthly auto loan payment, monthly student loan payment, and monthly credit card payment).

Housing Ratio

Housing ratio is calculated by the projected monthly mortgage payment divided by monthly gross income.

For example: Assume the projected monthly mortgage payment is \$3,600. The monthly gross income is \$10,000. The Housing Ratio is 36% (\$3,600 divided by \$10,000).

Income Ratio

Income ratio is the calculation of both the Housing and Debt-to-Income (DTI) ratios.

Residual Income

Residual income is the amount of the "net take home" income remaining after the deduction of monthly housing expenses, taxes, and debt obligations (i.e. credit card payments, auto payments, student loan payments, etc.) from monthly gross income. The minimum residual income (net take-home income after netting out expenses from monthly gross income) must be equal to or greater than \$1,100. A 10 percent reduction in the residual income minimum level required to qualify for a mortgage loan or HELOC is allowed for any loan amount under \$300,000.
